LIQUIDITY MODEL

# P2P SYSTEM

## LIQUIDITY DRIVEN BY THE COMMUNITY

The system does not depend on a clock. It depends on the community's activity level.

### +ACTIVITY + SPEED

Purchases, activations, repurchases and user-to-user transactions generate the flow.

### + CONTINUOUS LIQUIDITY

Liquidity is constantly injected into the P2P channel. The flow does not disappear; it simply shifts from sporadic to continuous.

Liquidity comes from activity within the ecosystem, not just from new participants.
